

The Geyser Pump

Patented Pump Technology that will Change the Wastewater Industry!

Return Sludge Pump Clogging?
No Way to Adjust RAS?
Poor Settling in Clarifiers?

The Geyser Pump Advantage:

- ◆ More precise control of Return Activated Sludge (RAS)
- ◆ Pump heavier RAS (up to 5%) consistently
- ◆ Eliminate hydraulic washout of solids associated with high volumes of RAS
- ◆ Higher suction lift capability versus conventional airlift pumps
- ◆ Return the bugs, not the water from the clarifier
- ◆ Improve settling and effluent quality
- ◆ Less air than conventional airlift pump and *NO* additional electric service
